## 1. Query related to Medical Symptoms.

I have a slight pain, and blocked nose.

I understand you're experiencing a slight pain and blocked nose. While I can't provide medical advice, it's important to consider the information you've provided about a deviated septum.

Based on what you've read, a deviated septum can cause a blocked nose and potentially lead to sinus issues. However, a slight pain could also be related to other factors like allergies, a common cold, or even a sinus infection.

Here's what I recommend:

- **Consult a doctor:** A doctor can properly diagnose the cause of your symptoms. They can examine your nasal passages and determine if a deviated septum is contributing to your blocked nose and pain.
- **Over-the-counter relief:** While waiting for a doctor's appointment, you can try over-the-counter decongestants, saline sprays, and antihistamines for temporary relief.
- **Home remedies:** Humidifiers can help to loosen mucus, and hot showers or steam inhalation

## 2. Query not related to Medical Symptoms.
